ASEPT® Pleural and Peritoneal Drainage Systems

Catheter Procedure Kit

The ASEPT Drainage System is a complete insertion kit for pleural or peritoneal catheter implantation. The primary component of the ASEPT Drainage System is the catheter, which has a self-sealing valve attached to the proximal end that prevents leakage and provides a secure, needle-free Luer lock connection. The ASEPT Valve is connected to the drainage line on the ASEPT Evacuated Drainage Bottle or Bag to initiate drainage.

The ASEPT Drainage Line set is also available as a stand-alone set to allow drainage to compatible drainage collection units.

Kit Contents:

- One - 15.5 Fr ASEPT Silicone Drainage Catheter (Pleural or Peritoneal Drainage)
- One - CSR Wrap

TRAY 1:

- Two - ChloraPrep™ 10.5 mL Tint
- One - Synthetic Suture, 2-0 Straight Needle
- One - Synthetic Suture, 3-0 Curved Needle

TRAY 2:

- Two - 5 cc Syringes
- One - 10 cc Syringe
- One - 22 G x 1.5" Needle
- One - 25 G x 1.0" Needle
- One - 18 G x 7 cm Guidewire Introducer Needle
(Effective Length 7 cm)
- One - .035" J-Tip Guidewire
- One - Safety Scalpel
- One - 16 Fr Tear Away Introducer
- One - 12 Fr x 17.77 cm Dilator
(Effective Length 17.77 cm)
- One - 8 Fr x 17.77 cm Dilator
(Effective Length 17.77 cm)
- One - Tunneler
- One - Forceps

TRAY 3:

- One - Fenestrated Drape
- One - 16 G x 1.0" Needle
- One - 5-in-1 Drainage Line Adapter
- One - 60" ASEPT Drainage Line with Protective Cap
- One - Foam Catheter Pad
- Six - 4"x 4" Gauze Pads
- One - 6"x 8" Tegaderm® Self-Adhesive Dressing

Item	Reference Number	Case Qty.
ASEPT Pleural Drainage System (Includes ASEPT Pleural Drainage Catheter and Insertion Kit) 15.5 Fr (.516 cm) x 26"	622289	1
ASEPT Peritoneal Drainage System (Includes ASEPT Peritoneal Drainage Catheter and Insertion Kit) 15.5 Fr (.516 cm) x 28"	622284	1

ASEPT® Drainage Kits

600 mL and 1,000 mL Evacuated Bottles ♦ 2,000 mL Bag

Drainage Procedure Kit

The primary components of the ASEPT Drainage Kit are the evacuated bottle or drainage bag and the procedure pack with all the necessary dressing change items.

The evacuated bottle is available in either a 600 mL or 1,000 mL configuration. The drainage bag is available in a 2,000 mL configuration. The ASEPT Drainage Kit provides patients with a convenient and compassionate way to perform drainage at home or in any outpatient setting.

Procedure Pack:

- One - Blue Emergency Slide Clamp
- Three - Alcohol Pads
- One - Foam Catheter Pad
- Six - 4"x 4" Gauze Pads
- Four - Gloves
- One - 6"x 8" Tegaderm® Self-Adhesive Dressing

Item	Reference Number	Case Qty.
ASEPT 600 mL Drainage Kit (Includes ASEPT 600 mL Evacuated Bottle with 30" Drainage Line and Procedure Pack)	622287	10
ASEPT 1,000 mL Drainage Kit (Includes ASEPT 1,000 mL Evacuated Bottle with 30" Drainage Line and Procedure Pack)	622279	10

ASEPT® Evacuated Drainage Bottles

600 mL and 1,000 mL (Sterile Field Ready)

- Shatterproof, lightweight, plastic bottle for safe and secure, needle-free containment of biohazardous fluids
- Potential reduction of hazardous waste costs compared to evacuated glass containers
- Available with a valved, Y-site drain line for sampling or without drain line for direct, needle-free closed-system connection

Compatible with:

- ASEPT Pleural and Peritoneal Drainage Catheter System
- ACCEL® Centesis Catheters
- ACCEL Connection Sets
- Other drainage collection devices utilizing standard Luer connections

Item	Reference Number	Case Qty.
*ASEPT 600 mL Evacuated Drainage Bottle with Y-Site Sampling Port and Drain Line	M7052	10
*ASEPT 1,000 mL Evacuated Drainage Bottle with Y-Site Sampling Port and 30" Drain Line	M7050	10
*ASEPT 1,000 mL Evacuated Drainage Bottle without Drain Line	622273	10

*Individually Packaged (Sterile Field Ready)

~~DEHP~~ Not made with DEHP

ACCEL® Connection Sets

Provide a safe and secure Luer lock connection for containment of biohazardous fluids during drainage. Closed male Luer sets provide for a safe and secure closed system during evacuated bottle exchanges. Kink-resistant tubing for the aspiration, removal, or sampling of body fluids using an external vacuum source.

Item	Reference Number	Length	Case Pack
SPIN-LOCK® SET: Two Spin-Lock Male Luer Connectors with Pinch Clamp and Non-Vented Spike	470190	51 in. (130 cm) approx.	50
CLOSED MALE SET: Closed Male Luer Lock Valve to Spin-Lock	470191	51 in. (130 cm) approx.	50
SPLIT CLOSED MALE SET: Bifurcated Set with Two Closed Male Luer Lock Valves to Spin-Lock Male Luer Connector with Pinch Clamp	470192	48 in. (122 cm) approx.	50

ACCEL® Evacuated Drainage Bottles

600 mL, 1,000 mL and 2,000 mL

- Shatterproof, lightweight, plastic bottle for safe and secure, needle-free containment of biohazardous fluids
- Safe and secure, Luer lock, needle-free access
- Vacuum up to 26 inHg (inches of mercury) of negative pressure
- Potential reduction of hazardous waste costs compared to evacuated glass containers
- Large green vacuum indicator and convenient hanging strap

Compatible with:

- ASEPT® Pleural and Peritoneal Drainage Catheter System
- ACCEL Centesis Catheters
- ACCEL Connection Sets
- Other drainage collection devices utilizing standard Luer connections

Item	Reference Number	Case Qty.

ACCEL® Centesis Catheters and Procedure Kits

- Removable vented flash plug on the needle hub further promotes a closed system environment during catheter insertion
- Ergonomically designed clear needle hub for visual confirmation of drainage fluid flashback
- Catheter and needle assembly promote an atraumatic catheter insertion point through a seamless needle-to-catheter tip transition and an echogenic needle tip

ACCEL Valved Centesis Catheter

Automatic Fluid/Air Stop Valve

Catheter hub features integrated, fluid/air stop, self-sealing valve allowing for automatic containment of patient drainage fluid and reduced risk of pneumothorax after needle removal.

Radiopaque catheter sheath—with three (3) large elliptical cut, spiral configured side holes on the catheter tip area for maximum 360° drainage coverage and flow.

Clear Needle Hub with Catheter Lock

Four Spiral Configured Side Holes

ACCEL® Valved Centesis Catheter Procedure Kits

Help manage the risk of bloodstream infections, maintain a sterile field, reduce waste, and control costs by having all components together in one convenient kit.

Procedure Kit Contents:

One - ACCEL Valved Centesis Catheter

Accessories:

- One - Drug identification label set
- One - ACCEL Connection set, 51"
- One - 3 mL ChloraPrep® Applicator
- One - #11 safety scalpel
- Two - 5 mL ampule 1% lidocaine
- One - High flow four-way stopcock
- One - Sharps foam block
- Two - 10 mL specimen vial
- One - Female Luer lock spike
- One - 5-in-1 drainage adapter
- One - Red combination cap
- Two - 1.75" filter straws

Needles and Syringes:

- One - 25 G x 1" safety needle
- One - 23 G x 1.5" safety needle
- One - 18 G x 1.5" safety needle
- One - 10 mL Luer lock syringe
- One - 60 mL Luer lock syringe

Drapes, Towels and Dressings:

- One - Fenestrated procedure drape
- One - CSR wrap
- One - Paper towel
- Twelve - 4" x 4" gauze pads
- One - Adhesive bandage

UNIVERSAL Drainage Bag

- Holds up to 600 mL of waste
- Flexible silicone tubing that facilitates trimming to a desired length
- Soft Velcro® Strap cushions the securement of the bag system to the patient
- Twist valve facilitates quick and easy disposal of bag contents
- Internal anti-reflux valve prevents retrograde flow

Indications for Use:

ASEPT® Pleural and Peritoneal Drainage Systems

The ASEPT Pleural Drainage System is intended for long-term, intermittent drainage of symptomatic, recurrent pleural effusions.

The ASEPT Peritoneal Drainage System is indicated for periodic drainage of recurrent and symptomatic malignant ascites.

The primary components are the ASEPT Pleural or Peritoneal Drainage System and the ASEPT® Drainage Kits (one 600 mL vacuum bottle or one 1,000 mL vacuum bottle). Replacement valves and drain lines with 5-in-1 adapters are available as well.

ASEPT® Evacuated Drainage Bottle with or without Drain Line

The ASEPT 600 mL or the ASEPT 1,000 mL Evacuated Drainage Bottle is a non-powered, single-patient, portable suction device that consists of a manually operated plastic disposable evacuation system intended to provide a vacuum for suction drainage of surgical wounds. This set is used for large wound-areas. (e.g., after surgical operations).

ASEPT® Replacement Valve

The ASEPT Replacement Valve is used for replacing the valve attached to the ASEPT® Pleural or Peritoneal Drainage Catheter in case of occlusion or malfunction.

The ASEPT Pleural or Peritoneal Drainage Catheter is the main component of the ASEPT Pleural or Peritoneal Drainage System.

ASEPT® Drainage Line

The ASEPT Drainage Line is an accessory to the ASEPT Pleural or Peritoneal Drainage System that is used for connecting the ASEPT Catheter to wall suction or standard fluid collection equipment. The ASEPT Pleural or Peritoneal Drainage Catheter is the main component of the ASEPT Pleural or Peritoneal Drainage System.

ASEPT® Evacuated Bare Drainage Bottle

The ASEPT 600 mL or the ASEPT 1,000 mL Evacuated Bare Drainage Bottle is a non-powered, single-patient, portable suction device used to aspirate, remove or sample body fluids.

ACCEL® 600 mL, 1,000 mL, and 2,000 mL Evacuated Drainage Bottles

The ACCEL Evacuated Drainage Bottles are intended for use to aspirate, remove or sample body fluid.

ACCEL® Connection Sets

The ACCEL Connection Sets are intended for use for the aspiration, removal, or sampling of body fluids using an external vacuum source.

PRECAUTION: Not intended for use with power injectors.

ACCEL® Valved Centesis Catheter

The ACCEL Valved Centesis Catheter is indicated for the therapeutic or diagnostic aspiration of fluids from body cavities.

ACCEL® Centesis Catheter

The ACCEL Centesis Catheter is indicated for short-term percutaneous fluid drainage.

ASEPT® 2,000 mL Drainage Bag

The ASEPT 2,000 mL Drainage Bag is an accessory to the ASEPT Peritoneal Drainage System and is used for peritoneal drainage with the ASEPT Peritoneal Drainage Catheter.

The catheter is intended for long-term access of the peritoneal cavity in order to relieve symptoms such as dyspnea.

Universal Drainage Bag

The Closed Fluid Collection System is used for acute and long-term abscess drainage, pleural drainage and chest drainage.

ACCEL® Access 3-Piece Introducer System

The ACCEL Access 3-Piece Introducer System is indicated for use in percutaneous introduction and placement of catheters and guidewires.

Trocar and Chiba Introducer needles are used for percutaneous introduction of guidewires.

Guidewires are intended for use in percutaneous procedures to introduce and position catheters and other interventional devices within the coronary and peripheral vasculature.

ACCEL® All Purpose Drainage Catheter Sets with TrueGlide® Hydrophilic Coating

ACCEL All Purpose Drainage Catheter Sets with TrueGlide® Hydrophilic Coating are designed for percutaneous drainage of abscesses applied in the gastroenterological system, urological system and other applicable drainage abscesses.

ACCEL® Biliary Drainage Catheter Sets with TrueGlide® Hydrophilic Coating

ACCEL Biliary Drainage Catheter Sets with TrueGlide Hydrophilic Coating are designed for percutaneous drainage of abscess fluid, cyst, gallbladders, nephrostomy, urinary and other fluids.

ACCEL® Secure Catheter Stabilization Device

ACCEL Secure Catheter Stabilization Device is a sterile device for percutaneous catheters and tubes, consisting of a hydrocolloid adhesive with an outer adhesive cover.

Refer to the Instructions for Use for complete indications, relevant warnings, precautions, complications and contraindications.
